

THC & MY RESPONSE

- Finance—Read on the internet where the White House has put a freeze on federal dollars, does that affect us.

- This issue was in the Policy Committee with the recommendation that we post the proposed changes to the policy for public comment, I don't recall having a follow-up meeting where we discussed the comments.
 - Did we skip a step?

 - What were the comments?

 - Category of Yes/No

 - Does the general public understand the process for making comments

- Have we fully explored legal ramifications if we hire someone who tested positive and something untoward occurred in the classroom?

If you are an infrequent user, the test would show negative...

- Why should the standard of bus drivers be higher than the teachers
 - ◆ Teachers are spending more time with students

- I've been witnessing the negative effects THC has on the young adult population whom many started experimenting with in high school.

The chemical plunged them into major mental health issues. Plus, open the door for them to begin using other drugs.

- Concerned about our movement toward the left, voted to end non-sectarian prayer based on 1 complaint, responded entirely too late to an issue, and now voting to change our drug policy which sounds like we are lowering our standard. WSFS-Schools has always stayed away from these controversial items and focused on academics. I hope we are not slipping.
- Like to make a Substitute Motion that we table until we have done more homework.
